Art Unit: 1755

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-32 are rejected under 35 U.S.C. 102(a and/or b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over del Real et al. (Spanish Abstract) or DE 29922585 (Biovision).

Real et al. teach a method of making a macroporous calcium phosphate ceramic by adding sodium bicarbonate to the mixture thus anticipating the instant invention (see abstract).

DE '585 teaches a method of making a macroporous ceramic by mixing polyethylene (pore forming agent) and ammonium carbonate (pore forming agent)

Even if not anticipated, it would appear that the two distinct materials would render the applicant's claimed composition and method obvious to one of ordinary skill in the art because there would appear to be two different pore forming agents in both references.

It is noted that references crossed out and not considered on applicants PTO-1449 did not contain a date and thus could not be considered "prior" art.
